Professional Summary

Data Scientist with hands-on experience developing ML models, AI-Assisted systems, and production-ready solutions. Expertise in machine learning, NLP, computer vision, and generative AI. Proven track record delivering measurable business impact through data-driven insights and automated solutions.

Technical Skills

Programming: Python, Java, SQL
ML & GenAI: Scikit-learn, TensorFlow, LangChain, LangGraph, Open-Source/API LLM Integrations
Web Development: HTML, CSS, JavaScript, FastAPI, REST APIs, JWT, PostgreSQL, Git
Data & Tools: Pandas, NumPy, ChromaDB, Streamlit, Ollama, YOLOv8, OCR
Specializations: Machine Learning, NLP, RAG Systems, DBMS

Professional Experience

Full-Stack AI Engineer | **Auro-Itech Solutions (Intern)** *Dec 2025 – May 2026*
- Developed an AI-Assisted HR recruitment platform using HTML/CSS/JS, FastAPI and PostgreSQL, featuring LLM-based resume parsing, skill extraction, and ATS fit scoring, JWT-secured role-based workflows, automated interview scheduling, candidate onboarding, and real-time hiring analytics.

AI/ML Engineer | **Optisol Business Solutions (Intern)** *Jun 2024 – Dec 2024*
- Built a Multi-tool conversational agentic AI chatbot for a relocation services company using LangChain, LangGraph, RAG, vector embeddings, handling 500+ daily queries with a 92% satisfaction rate.

Machine Learning Engineer | **Virudhunagar Textile Mills Pvt Ltd (Intern)** *Dec 2023 – Jan 2024*
- Deployed a YOLOv8 and OCR pipeline to process bulk PDF invoices, detecting and extracting only the required fields into structured CSV files for downstream processing (90% accuracy, 1000+ weekly invoices, 85% time reduction), and built data pipelines for real-time inventory management.

Key Projects

MediMind AI – Healthcare Intelligence System (Text–to–SQL)
- Built end-to-end multi-agent AI platform using LangGraph, and RAG architecture, achieving 95% accuracy in medical data analysis and automated patient information retrieval
- **Tech Stack:** LangChain, LangGraph, Ollama-Mistral, FastAPI, PostgreSQL, Vector Embeddings

Identifying the Most Influential Student Learning Obstacles
- Analyzed diverse academic, lifestyle, and environmental factors from a dataset of 2,473 TCE students to identify key obstacles impacting academic performance (SGPA)
- **Tech Stack:** Python, Pandas, Scikit-learn, Random Forest, Decision Trees, Feature Engineering

Education

MSc Data Science (5-Year Integrated) *2021 – 2026*
Thiagarajar College of Engineering, Madurai | **CGPA**: 8.3/10

Higher Secondary Education *2019 – 2021*
VMJ Higher Secondary School, Madurai | **Percentage**: 92.6% (ISC)

Achievements

- **Innovation Award:** 3rd Place, Madurai Hackathon 2022 – AI/ML Track *Aug 2022*
- **Technical Excellence:** 2nd Place, Tech Quiz, American College BYTES 2K23 *Feb 2024*
- **Leadership:** Captain, College Basketball Team, Thiagarajar College of Engineering *Mar 2024*
